1927.

THE NEW ZEALAND JOURNAL OF AGRICULTURE.

VOLUME XXXIV.

(January–June, 1927.)

INDEX.

A.

Agricultural College Council, 104.
Agriculture, International Congress of, 1927, 243.
Agricultural statistics, collection of, in New Zealand, 144.
Alysia manducator, 1.
Answers to inquiries, 71, 140, 214, 287, 357, 429.
Apiary, the (monthly notes), 53, 123, 204, 275, 350, 423.
Apples and pears, export of, in 1927 season, 63.
Apples, outdoor storage of, 214.
Apple-packs for Canadian standard case, 143.
Apples, storage of, on the farm, 287.
Arboretum, national, 18.
Artichoke tubers for seed, 431.
Artichokes, fungus disease attacking, 402.
Artichokes, fungus disease in, 357.
Aston, B. C.—Mortality among lambs in Central Otago, 231.
Atkinson, Esmond—Weeds and their identification: Strawberry-raspberry, 5.
Avocado, 328.

B.

Bacon-curing, 358.
Barley, covered smut of, 304.
Barley, seed, hot-water treatment of, 409.
Bees and section honey, 215.
Beeswax, treatment of, 350.
Beetles, brown and bronze, control of, in the orchard, 236.
Biological control of noxious weeds, 84.
Blackberry attacked by fungi, 246.
Blackberry, insect control of, 84.
Blackberry pest, the, 376.
Blake, T. A.—Foot-rot in sheep and its treatment, 302.
Blow-flies, 1.
Books received, 142.
Borer in lemon-trees, 287.
Bracken and hard fern attacked by fungi, 247.
Brown and bronze beetles, control of, in the orchard, 236.
Broom attacked by fungi, 245.
Brown, F. C.—
Poultry-keeping (monthly notes), 51, 120, 202, 273, 347, 420.
Selling poultry by weight, 321.
Burning and sowing trials, 145.
Butter and cheese quality, 337.
Butter-box tests: The "Coombs" box, 109
Butterfat, production of, 294.
Butter, home-made, for long keeping, 140.

C.

Californian thistle, destroying, 426.
Canadian standard case, apple-packs for, 143.
Canadian thistle attacked by fungi, 244.
Castration of colts, age for, 140.
Cattle, classification of, in New Zealand, 68.
Cattle-ticks and redwater: Experiments indicate the New Zealand tick as non-carrier of piroplasmosis, 16.
Census of poultry, 1926, 139.
Certificate-of-record system in 1926, 173.
Cheese-crate tests: Development of balanced construction to minimize breakage during transit, 19.
Chemistry Section.—Importation of fertilizers, 1926–27, 340.

Citrus-culture (monthly notes), 50, 119, 201, 271, 346, 419.
Cockayne, Dr. L., honour for, 426.
Cockayne, L.—The Otari open-air native-plant museum, 309.
Collection of agricultural statistics in New Zealand, 144.
Control of brown and bronze beetles in the orchard, 236.
Control of downy mildew and phylloxera in vines (regulations), 143.
Convolvulus, insect control of, 90.
"Coombs" butter-box, tests with, 109.
C.O.R. testing of purebred dairy cows (lists), 41, 127, 263.
Coroebus rubi, 85.
Correction, 40, 360.
Couch, destruction of, in Marlborough, 338.
Covered smut of barley and its control, 304.
Cow, hard-milking, 288.
Cow with cracked hoofs, 141.
Cream-grading regulations, 130.
Crop-binding in poultry, 274.
Crop, soft or distended, in poultry, 275.
Cunningham, G. H.—
"Natural control" of weeds and insects by fungi, 244.
Fungus disease attacking artichokes, 402.

D.

Dairy cattle, export of purebred, 185.
Dairy Division.—C.O.R. lists, 41, 127, 263.
Dairy-produce general regulations, 57, 130, 208, 279.
Dallas, W. K.—
The orchard (monthly notes), 47, 117, 200, 270, 345, 418.
The pruning of orchard trees, 333, 413.
Danthonia pasture, treatment for, 357.
Destruction of tall couch: Extended experiments in Marlborough, 338.
Downy mildew in vines, regulations for control of, 143.
Drinking-holes for stock, 278.

E.

Earp, E. A.—The apiary (monthly notes), 53, 123, 204, 275, 350, 423.
Earwig, the European: Its habits and control, 395.
Empire Marketing Board posters in Britain, 285.
Ensilage, feeding out, 269.
Entrican, A. R., and Ward, W. C.—Cheese-crate tests, 19.
Estimated yields of wheat and oats, 139.
Eucalypts, nomenclature of, 8.
European earwig, the: Its habits and control, 395.
Ewes, period of heat in, 430.
Experiments on manuring of potatoes in Canterbury, season 1925–26, 97.
Export of apples and pears, 1927 season: Government guarantee and regulations, 63.
Export of purebred dairy cattle, 185.

F.

Fair packing of fruit and vegetables (regulations), 142.
Farm machinery in New Zealand, 216.
Farm, the (monthly notes), 45, 115, 197, 267, 343, 417.
Feijoa, 326.
Fern country, breaking in virgin, 46.
Fertilizers, importation of, 1926–27, 340.
Field experiments, positive and negative results in, 342.
Fields Division.—The farm (monthly notes), 47, 115, 197, 267, 343, 417.
Filly, derangement in, 140.
Foot-and-mouth disease, precautions against, 428.
Foot-rot in sheep and its treatment, 302.
Forest nomenclature: With special reference to the eucalypts, 8.
Forestry League competition for juveniles, 142.
Foul-in-the-foot, 72.
Fowl-manure, 141.
Foxglove, insect control of, 90.
Foy, N. R.—
The official seed-testing station, record of operations for 1926, 186.
Germination of hulled oats, 412.
Freezing companies (meat), 137.
Fruit and vegetables, fair packing of (regulations), 142.
Fruit culture, subtropical, 323.
Fruit, Empire, in Britain, 104.
Fruit, picking of, 49.
Fungi, "natural control" of weeds and insects by, 244.
Fungus disease attacking artichokes: Incidence, life-history, and remedial treatment, 402.

G.

Germination of hulled oats, 412.
Germination of treated seed wheat when sowing delayed, 429.
Gibbs, J. G., and McCulloch, W. J.—Pasture top-dressing experiments in Wellington and southern Hawke's Bay, season 1926–27, 295.

Gill, D. A.—"Pulpy kidney" disease of lambs: Investigation in Central Otago, season 1926, 218.
Guava, 326.
Goats'-rue attacked by fungi, 248.
Gorse attacked by fungi, 246.
Gorse, insect control of, 88.
Grading of butter and cheese, 209.
Grass-grub and tree nurseries, 70.
Grasslands of New Zealand, the: Progress of regrassing experiments on deteriorated hill country in Whangamomona County, 145, 361.
Grasslands of New Zealand, the: Regrassing experiments on deteriorated hill country in Whangamomona County, 1925 and 1926, 73.
Grass-seed mixture for Thames District high bush country, 141.
Grass-seed, regulations for importation of, from Australia, 432.
Greasy heel in horses,. 71.
Green chafer and pasture, 140.
Greenwood, F. W.—Destruction of tall couch: Extended experiment in Marlborough, 338.
Grimmett, R. E. R.—Iron-starvation in ruminant stock: Correlation with land features in the pumice soil-province, 289.
Growth of *Phormium tenax*, the, 17, 415.

H.

Hand distributors for top-dressing hill country, 105.
Hay, straw, and chaff, importation of, 354.
Hedges and shelter-trees for homestead and farm, 91.
Hewlett, C. H.—Hot-water treatment of seed barley: Field experiments in Canterbury, 409.
Hildres hand manure distributor, 105.
Hive, minor materials and products of the, 185.
Honey, fermenting of, 357.
Honey-grading ports, 142.
Hopkirk, C. S. M.—Cattle-ticks and redwater, 16.
Horticultural Congress, 308.
Horticulture (monthly notes), 54, 124, 205, 276, 351, 424.
Horticulture Division—
Apple-packs for Canadian standard case, 143.
Control of brown and bronze beetles in the orchard, 236.
Hot-water treatment of seed barley: Field experiments in Canterbury, 409.
Howell's manure distributor, 105.
Hudson, A. W.—
Experiments on manuring of potatoes in Canterbury, season 1925–26, 97.
Hudson, A. W.—*continued.*
Liming and phosphate top-dressing experiments on pasture in Canterbury, 1924–25–26, 252.
Positive and negative results in field experiments, 342.
Hulled oats, germination of, 412.
Hyde, W. C.—
Horticulture (monthly notes), 54, 124, 205, 276, 351, 424.
Hedges and shelter-trees for homestead and farm, 91.

I.

Importation of fertilizers, 1926–27, 340.
Importation of grass-seed from Australia, regulations for, 432.
Insect control of noxious weeds: Joint scheme initiated against blackberry and other species, 84.
Insects and weeds, "natural control" of by fungi, 244.
International Congress of Agriculture, 1927, 243.
International Horticultural Congress, 1927, 308.
Inventions of agricultural interest, 68, 216, 356.
Iron-starvation in ruminant stock: Correlation with land features in the pumice soil-province, 289.
Italian bees and section honey, 215.

K.

King-country land, treatment for, 71.

L.

Lambs, mortality among, in Central Otago, 231.
Lambs, "pulpy kidney" disease of: Investigation in Central Otago, 218.
Lambs, travelling of fat, 83.
Lampas in horse, 288.
Land-holdings, tenures of, 172.
Land-treatment and crop-rotation in horticulture, 206.
Lemons, 323.
Lemon-trees, borer in, 287.
Levy, E. B.—The grasslands of New Zealand, 73, 145, 361.
Licensed meat-export works in New Zealand, season 1926–27, 137.
Liming and phosphate top-dressing experiments on pasture in Canterbury, 1924–25–26, 252.
Liming and top-dressing of pasture at Winton Experimental Farm: Results for 1926, 194.

Liming of pastures: Initial results of experiments in Auckland, 389.
Loquat, 325.
Lucerne-culture, 47, 116, 268.
Lupins, blue, for green manure and sheep feed, 116.

M.

Machinery, farm, in New Zealand, 216.
MacKenzie, J. G.—The Otari open-air native-plant museum, 309.
Manuka, clearing of, 432.
Manure distributors for hill country, 105.
Manures, home-saved, 56.
Manurial top-dressing of grazing-country, system in, 430.
Manuring experiments on potatoes in Canterbury, 97.
McCulloch, W. J.—Top-dressing of hill-country grasslands: Two new hand distributors, 105.
McCulloch, W. J., and Gibbs, J. G.—Pasture top-dressing experiments in Wellington and southern Hawke's Bay, season 1926–27, 295.
McGillivray, R.—Liming and top-dressing of pasture at Winton Experimental Farm, 1926, 193.
Meat-export works, licensed, in New Zealand, season 1926–27, 137.
Meterological Office: Weather records (monthly), 69, 138, 212, 282, 359, 427.
Mildew on lettuce, 72.
Miller, D.—Parasitic control of sheep maggot-flies, 1.
Mortality among lambs in Central Otago: Chemical analyses of pastures, milk, and soils, 231.
Motor tires, old, for farm implement wheels, 83.
Muggeridge, J.—The European earwig: Its habits and control, 395.

N.

National brand for butter and cheese, 134, 135.
"Native heather," destruction of, 431.
"Natural control" of weeds and insects by fungi, 244.
Neill, J. C.—
  Oat-smut and its control, season 1926–27, 237.
  Covered smut of barley and its control, 304.
New dairy-produce regulations, the, 57, 139, 279.
New Zealand Agricultural College Council, 104.
New Zealand Wool Committee, 288.
Northcroft, E. F.—The blackberry pest, 376.
Noxious-weeds orders, 278, 388.

O.

Oats and wheat, estimated yields of, 139.
Oats, hulled, germination of, 412.
Oat-smut and its control: Survey and experimental work, season 1926–27, 237.
Occupation and utilization of land in New Zealand, 136.
Official seed-testing station, the: Record of operations for 1926, 186.
Old motor-tires for farm-implement wheels, 83.
Olearia solanderi, destruction of, 431.
Open-air native-plant museum, the Otari, 309.
Oranges, 324.
Orchard production, 18.
Orchards, market gardens, &c., area of, 164.
Orchard sprays and live-stock, 431.
Orchard, the (monthly notes), 47, 117, 200, 270, 345, 418.
Oviduct, protusion of, 52.
Otari open-air native-plant museum the, 309.

P.

Paper method of weed-control, 40.
Paralysis in pigs, 287.
Parasitic control of sheep maggot-flies, 1.
Paspalum-seed production in New South Wales, 308.
Passion-fruit, 326.
Pasteurising milk for cheesemaking, 40.
Pasture-management, 267.
Pasture top-dressing experiments in Otago, 329.
Pasture top-dressing experiments in Wellington and southern Hawke's Bay, season 1926–27, 295.
Patterson, T. H.—Paspalum-seed production in New South Wales, 308.
Patterson, T. H., and Woodcock, J. W.—
  Manuring of early potatoes: Experiments in Auckland Province, 1926, 165.
  Liming of pastures: Initial results of experiments in Auckland, 389.
Peas for pigs, 286.
Phormium tenax, the growth of, 17, 415.
Phosphate top-dressing and liming experiments on pasture in Canterbury, 1924–25–26, 252.
Phylloxera in vines, regulations for control of, 143.
Pig-raising points, 430.
Pigs, classification of, 164.
Pigs, paralysis in, 287.
Pigs, young, prolapse of rectum in, 72.
"Plants of New Zealand" (review), 286.

Pruning of orchard trees, the, 333, 413.
Positive and negative results in field experiments, 342.
Potatoes, early, manuring of, in Auckland Province, 165.
Potatoes, experiments on manuring of, in Canterbury, season 1925–26, 97.
Potato strains, improvement of, 116.
Poultry, census of, 126, 139.
Poultry-farming, commercial, 70.
Poultry-keeping (monthly notes), 51, 120, 202, 273, 347, 420.
Poultry, selling by weight, 321.
Pukeora Sanatorium farm, silo at, 266.
"Pulpy kidney" disease of lambs: Investigation in Central Otago, season 1926, 218.

R.

Rabbit Districts, 142.
Rabbit-poisoning with phosphorized pollard, 429.
Ragwort, control of, 214.
Ragwort, insect control of, 89.
Redwater and cattle-ticks, 16.
Regrassing experiments in Whangamomona County, 73, 145, 361.
Regrassing experiments in Whangamomona County, 73.
Review: "Plants of New Zealand," 286.
Rice, W. H.—
Citrus-culture, 50, 119, 201, 271, 346, 419.
Subtropical-fruit culture, 323.
Roots, surface, of shelter-trees, 288.
Rubus illecebrosus, 5.
Rubus species, 376.
Ruminant stock, iron-starvation in, 289.

S.

Schlerotinia sclerotiorum fungus attacking artichokes, 402.
Scott, M. J.—Wheat manurial trials at Canterbury Agricultural College, season 1925–26, 12.
Seasonal notes (monthly), 45, 115, 197, 267, 343, 417.
Seed barley, hot-water treatment of, 409.
Secondary burns, sowing of, 45.
Secondary-growth country, studies on how best to win back, 361.
Seed mixtures for secondary burns, 145.
Seed-testing charges, 283.
Seed-testing station, the official: Record of operations for 1926, 186.
Seeds, importation of, into New South Wales, 7.
Selling poultry by weight, 321.
Sheep maggot-flies, parasitic control of, 1.
Share system in dairying, 141.
Sheep, foot-rot in, 302.
Shelter-trees and hedges, 91.
Shows, exhibitions, &c., list of, 360.
Shows, forthcoming agricultural, 62, 144, 216.
Shows, forthcoming winter, 288, 360, 432.
Silo at Pukeora Sanatorium farm, 266.
Simmonds, J. H.—Forest nomenclature, 8.
Smerle, G.—The growth of *Phormium tenax*, 17, 415.
Singleton, W. M.—
The new dairy-produce regulations, 57.
Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in 1926, 173.
Soil sterilizing, 277.
Sprays, orchard, and live-stock, 431.
St. John's wort, insect control of, 89.
Strawberry-raspberry (*Rubus illecebrosus*), 5.
Strychnine, reduction in price of, 360.
Subterranean clover seed sowing in Marlborough, 262.
Subtropical-fruit culture: Achievement and possibilities in the Auckland District, 323.

T.

Tall couch, destruction of, in Marlborough, 338.
Tauhinu attacked by fungi, 248.
Tennent, R. B.—Top-dressing experiments on pasture in Otago, 329.
Tenures of land-holdings, 172.
Testing of purebred dairy cows (C.O.R. lists), 41, 127, 263.
Tests of cheese-crates, 19.
Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in 1926, 173.
Threshing returns of wheat and oats, 285, 428.
Ticks and redwater in cattle, 16.
Tillyard, R. J.—Biological control of noxious weeds, 85.
Tobacco-growing notes, 54, 126, 278, 425.
Top-dressing and liming of grassland, 197.
Top-dressing and liming of pasture at Winton Experimental Farm: Results for 1926, 194.
Top-dressing experiments on pasture in Canterbury, 1924–25–26, 252.
Top-dressing experiments on pasture, in Otago: Preliminary trials, season 1926–27, 329.

Top-dressing experiments on pasture, Wellington and southern Hawke's Bay, 295.
Top-dressing of hill-country grassland : Two new hand distributors, 105.
Tree tomato, 327.
Tuberculosis in poultry, 203.
Trees and hedges for shelter, 91.

U.

Utilization of land in New Zealand, 136.

V.

Veterinary Surgeons Board, 285.
Veterinary surgeons registration regulations, 355.

W.

Ward, W. C.—Butter-box tests : The " Coombs " box, 109.
Ward, W. C., and Entrican, A. R.—Cheese-crate tests, 19.
Weather records (monthly), 69, 138, 212, 282, 359, 427.
Weed control, paper method of, 40.
Weeds and insects, " natural control " of, by fungi, 244.
Weeds and their identification : Strawberry-raspberry (*Rubus illecebrosus*), 5.
Weeds, noxious, insect control of, 84.
Whangamomona County, regrassing experiments in, 73, 145, 361.
Wheat and oats, estimated yields of, 139.
Wheat and oats threshing returns, 285, 428.
Wheat-manurial trials at Canterbury Agriculture College, season 1925–26, 12.
Wheat seed, treated, germination of, when sowing delayed, 429.
Wind-gall in horse's fetlock, 215.
Winton Experimental Farm : Liming and top-dressing of pasture at, in 1926, 194.
Winton Experimental Farm pasturage, 243.
Wireworms and their control, 215.
Woodcock, J. W., and Patterson, T. H.—
Manuring of early potatoes : Experiments in Auckland Province, 1926, 165.
Liming of pastures : Initial results of experiments in Auckland, 389.
Wool Committee, New Zealand, 288.
Wool deterioration of, 213.
Wool-improvement, 388.

Y.

Yarrow for secondary burns on hill country, 294.
